### About This Game

Forget what you have learnt in school. Milk does not come from boxes! And now you have the chance to participate on this ancient farm process (at least virtually).

Cow Milking Simulator is a whimsical arcade game. Your mission: milk the cow as fast as you can! Get the milk, sell some dairies, eat cheese, make money. But you have to be quick: a farmer's life is not as chill as you would think!

Cow Milking is a party game in virtual reality, ideal to play and pass with friends, making it a perfect game to show VR for the first time. Collect new products, new hats for your cow and don't forget to milk as fast as you can to mark your name in (leaderboards) history!

Best party game on steam

. very retro and very fun, brings back fond memories of childhood. Kaos studios has some talent behind their games, however it doesn't seem to be in the way of making the actual game.

Get frontlines for a forgettable shooter you can play once, but don't expect to be very engaged. Some of the gadgets in the game are neat, and I can see where many of the ideas for Homefront came from. Unfortunately, most of the game is boring and cookie cutter.

Frontlines also suffers from badguys take too many bullets syndrome. It's tough to kill enemies with the limited selection of weapons given to you. You might enjoy it once, but wait for a sale. Don't pay full price.. goat explode and fly high. i like licking the toaster. Pros: - great story

- challenging puzzles
- quite long

cons: - some bugs. I don't get the positive reviews at all. This game is an exercise in torture: it's a simple mouse and keyboard shooter, but the majority of your enemies are little black dots that you can't actually see until they're half a pixel away from your character. This means that when you try and fight and dodge the real enemies you end up randomly dying. Combine that with your view radius getting smaller if you get hit means that it actually gets harder if you make a mistake.

Maybe I'm weird, but I don't want to play a game just to die from (virtually) invisible enemies every time it starts getting interesting.

Plus the soundtrack is terrible. Avoid, just avoid.. This game was 100% worth the money that I spent on it. Dark Echo has a cool concept, and enough levels to keep things new and fresh.

Hard but that was fun. Anyway i couldn't beat the game ^^

????????????

В общем, всё класс спасибо за игру <3

Няшная милая и ничего сложного в ней вроде как нету ^^

Ня.. My favorite furrie con shooting simulator. this game is♥♥♥♥♥♥ well i couldn't say that i expected much more for 14 cents so. this game has me locked in so many ways ive never wished for death more than now

it could've been good

it could've been so much better. Pretty impressive game and the online assymetrical play is simply amazing. Plenty of VR owners are wishing to play with friends all over the world and not just locally and this does this incredibly well.

The game runs smooth, the game mechanics are nice and the game feels well made and loved.

My only negatives would be the maps. There are only 3. I would love to see many more (maybe including player made) and the VR Bots abilities. The scanners a bit lack luster and it would be better if you could enable certain options for custom games such as ability cooldown instead of 1 times.

If you own a VR system and are looking for a game to play with your pc friends....this is it!

Look forwards to the updates.

### **Video Roundup:**

Hey adventurers!

Just wanted to give a shout-out to the Youtubers and Streamers who have covered Aura of Worlds over the past month.

It's all been quite positive so far.

They've helped build awareness for the project, as well as providing feedback which has and still is being used to refine the game.

A toast to the following creators. **Top Indie Games you may have missed:**

Hi folks,

Just wanted to give a quick shout out to both Clemmy Games and Notable Releases for including our roguelite in their listings for the top games to launch last month.

You can check out their respective videos here:
